

ICT 4505: Website Design & Management (*Winter 2017*)
Design Assignment - Wireframe

Revised 2/11/2017

Project name: Wondrous Creatures by Sandra Klink
Stakeholder: Sandra Klink
Designer: Dane Klink

index.html

- *Navigate to `locations.html` in order to view show locations. To do so, select the menu option in grey.*
- *The menu options: Artist Statement, Show Locations, and Contact are standalone menu options. The options Gallery and Studio are in bold to exhibit that drop-down navigation will exist with those options.*
- *The `index.html` page will also contain a listing of upcoming shows. However, linking and dynamic mapping will not be available on `index.html`.*

locations.html

(1 of 2)

<Artist Statement>	<Show Locations>	[Gallery]	[Studio]	<Contact>
--	--	------------------	-----------------	---------------------------------

<“Locations”>

[<Upcoming Show Name \(MAP\)>](#)

[<Upcoming Show Name \(MAP\)>](#)

[<Upcoming Show Name \(MAP\)>](#)

[<Upcoming Show Name \(MAP\)>](#)

<Dynamic Map>

- *The listing of “Upcoming Show Names” will be linked to the art shows page, in addition to linking to a map entry.*
- *The “Previous Shows,” in the bottom-left will be implemented so that end-users can better understand the stakeholders past participation.*
- *The dynamic map will use Google Maps API to give a quick color-coded overview of participating shows.*

locations.html

(2 of 2)

<Artist Statement>	<Show Locations>	[Gallery]	[Studio]	<Contact>
--	--	------------------	-----------------	---------------------------------

<"Locations">

[<Upcoming Show Name \(MAP\) <Distance to location>>](#)

[<Upcoming Show Name \(MAP\) <Distance to location>>](#)

[<Upcoming Show Name \(MAP\) <Distance to location>>](#)

[<Upcoming Show Name \(MAP\) <Distance to location>>](#)

<Dynamic Map>

[<Previous Shows>](#)

➤ *locations.html uses a Zip code field to inform the end-user of their distance to location of the "Upcoming Show Name" listing, if Zip code is entered.*
